

● 2011年度「口腔環境制御研究」報告：新潟大学歯学部

---

1. Miyazawa H, Honda T, Miyauchi S, Domon H, Okui T, Nakajima T, Tabeta K, Yamazaki K. Elevated serum PCSK9 levels are associated with periodontal infection but do not correlate with LDL cholesterol level. Clin Chim Acta. 2012 413: 154-159.
2. Takahashi N, Okui T, Tabeta K and Yamazaki K. Effect of Interleukin-17 on the expression of chemokines in gingival epithelial cells. Eur J Oral Sci. 2011 119: 339-344.
3. Tabeta K, Tanabe N, Yonezawa D, Miyashita H, Maekawa T, Takahashi N, Okui T, Nakajima T, Yamazaki K. Elevated Antibody Titers to *Porphyromonas gingivalis* as a Possible Predictor of Ischemic Vascular Disease. J Atheroscler Thromb. 2011 18: 808-817.
4. Maekawa T, Takahashi N, Tabeta K, Aoki Y, Miyashita H, Miyauchi S, Miyazawa H, Nakajima T and Yamazaki K. Chronic oral infection with *Porphyromonas gingivalis* accelerates atheroma formation by shifting the lipid profile. PLoS ONE 6(5): e20240, 2011.
5. Yamazaki K, Tabeta K and Nakajima T. Periodontitis as a risk factor for atherosclerosis. J Oral Biosci 2011 53(3): 221-232.
6. Maekawa T, Tabeta K, Kajita-Okui K, Takahashi N, Honda T, Nakajima T and Yamazaki K. Increased expressions of C-reactive protein gene in inflamed gingival tissues could be derived from endothelial cells stimulated with interleukin-6. Arch Oral Biol 2011 56(11): 1312-1318.
